

REACH Certificate of Compliance

With reference to European Union Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH), Zaber's motion control devices meet the definition of "articles" for our EU customers. Zaber does not produce "chemicals", "substances", "preparations", or anything that would require registration, pre-registration, or authorization under REACH.

Although we have not performed chemical testing, we've made best efforts in cooperation with our suppliers to ensure that Zaber products with the CE mark do not contain substances from the Authorisation List (Annex XIV), the Restriction List (Annex XVII), or Substances of Very High Concern (SVHC), according to the Candidate list (located at <http://echa.europa.eu/web/guest/candidate-list-table>) published by ECHA (European Chemical Agency), in excess of the 0.1% w/w threshold specified for multi-component articles as of the date listed below.
